Jhenrich Roquios

IT DEVELOPER |BACK – END

An IT Developer with professional experience specializing in back-end and some front-end development. I design, deploy, and maintain systems primarily for manufacturing environments. My work includes creating technical documentation and analysis such as ERDs, data relationships, and process flows.

I develop applications using the Laravel framework with various approaches, including the TALL stack, Inertia Vue stack, and Volt. I am skilled in database management with SQL Server and MySQL, and I handle cloud deployments and cPanel management.

I also have knowledge of Arduino and minor hardware skills, enabling me to integrate software solutions with hardware components when needed. I am ready and eager to continue learning and enhancing my skills to deliver high-quality solutions.

Skills:

Back-End Development

- Laravel application development
- Business logic implementation
- Database integration (SQL Server, MySQL)
- Application deployment and maintenance
- Cloud deployments and cPanel management

Front-End Development

- Blade templates
- Vue.js (Inertia)
- Tailwind CSS
- Alpine.js

Collaborative & Professional Skills

- Version control (Git)
- Technical documentation and process flows
- ERD creation and data modeling
- Team-based development
- Continuous learning
- Basic Arduino and minor hardware skills

Experiences:

Sept 2023: Philippians Marketing Corporation (230hrs)

- Back End Web Developer – Intern

Aug 2024 - : Betafoam Corporation

- IT Programmer

Education:

2014 – 2018 : Bulihan National High School | Junior High

2018 – 2020 : Bulihan Integrated National High School | Senior High (STEM)

2020 – 2024 : Cavite State University – Carmona | College (BS Computer Science)
